

# Nature's Pharmacy in the ground

**Part 2**

*Don't miss  
this fascinating  
presentation!*

Nature has graced us with spectacular flowers which we enjoy growing and arranging. Nature has also provided us with a virtual pharmacy of drugs, all of which naturally come out of the ground. We will take a walk through "Nature's Pharmacy" and review the drugs various plants give us, such as peyote, magic mushrooms, marijuana, and nicotine to name a few.

Presented by Hilltoppers member, Jaime Diaz, a Professor Emeritus at the University of Washington, Department of Psychology, Behavioral Neuroscience division, and author of the book "How Drugs Influence Behavior," 3rd edition.

**Thurs., Jan. 9th**

**9:30 – 11:30 AM**

**Northlake Lutheran Church**
