

PANEL DESIGN

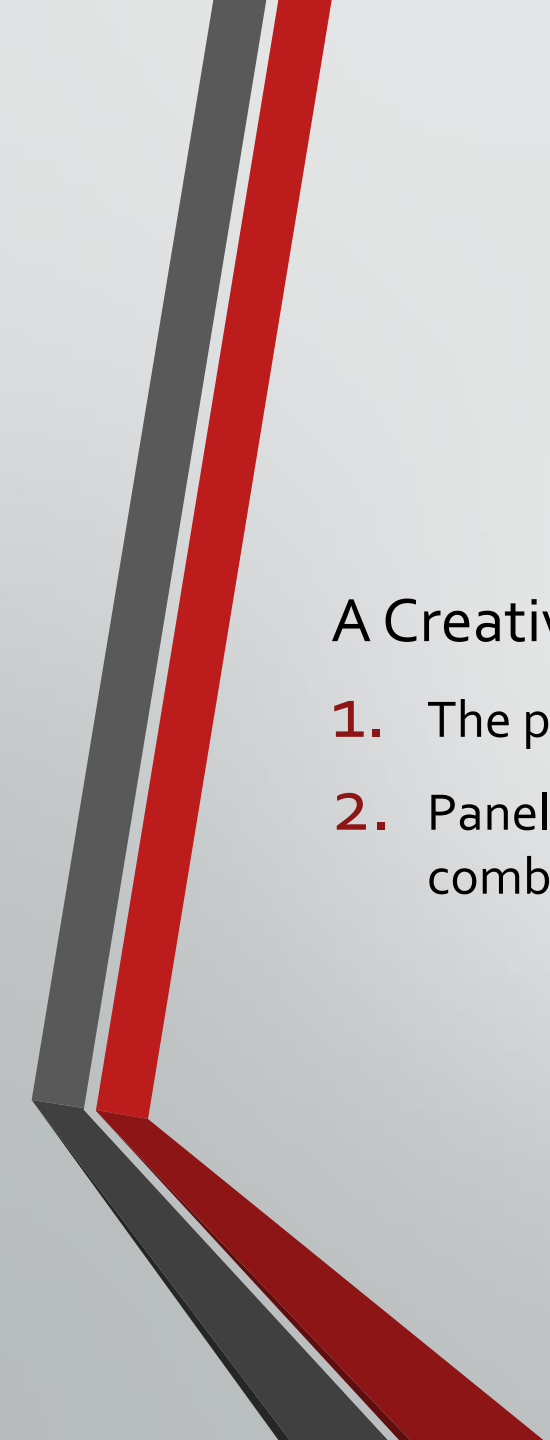

Expression “Awe” by Gloria Woo

October 12, 2026

Panel Definition

1. A flat, usually rectangular piece forming a raised, recessed, or framed part of the surface in which it is set.
2. A flat, usually rectangular part, or piece of wood, metal, cloth, etc., that fits into or onto something larger.

Description of Panel Design

A Creative Design using a structural panel/s as an integral part of the design.

1. The panel/s may be self-supporting or rely on a container/s or devices for support.
2. Panel components may be of any material, shape, or form, solid or transparent, or any combination.
